MARKET LESS ACTIVE. Prices Advanced Only in the Fina

Half Hour. New York, May 11 .- The dull con dition of the stock market today wa difficult to account for from any inci-dent in the news. The apparent completion of selling from quarters that were regarded as important gave som relief to an apprehension that inform ed interests were liquidating their holdings of stocks. Buying orders from London also predominated. The market was freed from the selling pressure in evidence yesterday, and sentiment was improved for that reason but there was little disposition to en-DIVIDEND

The sympathetic influence of strength in a few stocks, notably Reading. That stock met some very heavy selling orders i nihe course of his advance, but offered good resistance. The Eries were strong and estimates of the increase in that road's earning power were put in circulation. The stirring of the finitest for the Eries was believed to foreshadow the offering of additional securities incident to financing the road's further needs. The question of successful financing to meet approaching requirements had its reflection in the heavy tone of the Chicago Great Western issues and Toledo rallways. Part of the effect of repression on activity was due to the renewed rise in price of wheat and to some of the reports of unfavorable weather conditions in parts of the wheat belt. The turn to the buying side in the stock market on the part of London increased the supply of foreign exchange today, and took away from yesterday's show of firmness in that market, which was in spite of the rising tendency of interest rates here. Stock sentiment is not disposed to ignore the significance of the hardening of the money market in view of the free use which has been made of banking credits in carrying prices of securities up to their present price level. Readings rise to 156 1-4 placed it nearly two points above the price touched in the advance after the surrence court decision on the commodities clause and the highest since Janoreme court decision on the commodi-ties rights and the highest since Jan-nary of 1906.
